DOCM KITS & ACCESSORIES

When it comes to public buildings, it is crucial to ensure that the facilities are able to cater to every level of user ability. Considering that 18% of the UK population has a registered disability ¹ and potentially there will be over 6.25 million older people with a long-term limiting illness or disability by 2030, ² there is a greater necessity to ensure optimum ease of use for disabled and elderly people with mobility issues.

For complete ease of specification when considering for the less able, Bristan offer DocM product packs, which provide a one-stop-shop for the full scope of DocM requirements. Bristan DocM commercial products conform to the relevant industry standards and where appropriate are LABC approved.
