

## INFECTION CONTROL, WATER EFFICIENCY, SAFETY & PERFORMANCE

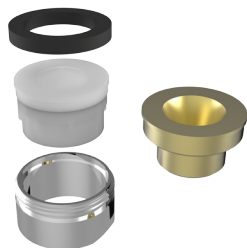

### WATER WAYS

The internals of the tap body are specially designed to limit standing water and allow the spout to fully drain when the tap is turned off.

### FITTING THE BASE

Proven first fix base – easy access to filters, flow limiters and NRV's when servicing and easy tap replacement.

### FLOW STRAIGHTENERS

An in-box choice of either fully draining (open outlet) or laminar flow straighteners (for non-draining spout) supplied offers greater flexibility.

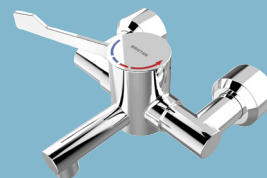

### SPOUT INTERNALS

Removable spout (machined with an angled waterway to facilitate water draining) can be replaced and cleaned to help with infection control. Spout is fitted using a grub screw for security.

## SPECIFYING WITH CONFIDENCE

We aim to help make it as easy as possible to select the right additional products to complete your specification.

### WALL MOUNTED H64 BASIN MIXER H64WMT2

### DECK MOUNTED H64 BASIN MIXER H64DMT2

### H64 REPLACEMENT SPOUT

SKSPOUT90 SHORT (90MM)  
SKSPOUT104 LONG (104MM)

### OPAC THERMOSTATIC EXPOSED BAR SHOWER VALVE

OP SHXVO EH C

### OPAC THERMOSTATIC CONCEALED SHOWER VALVE WITH CHROME LEVER

OP TS1503 CL C

At Bristan we continually invest in new product development to ensure that our products excel in terms of quality, safety and performance. With that in mind our comprehensive ranges of commercial specification products make life easier for specifiers, installers and maintenance personnel.

## SOLO2 THERMOSTATIC MONO BASIN MIXER

The Safest Healthcare Mixer Taps from Bristan

[www.bristan.com](http://www.bristan.com)

**NEW**

## SOLO THERMOSTATIC MONO BASIN MIXER

Designed specifically to meet the acute demands of the medical environment, the SOLO Thermostatic mono basin mixer has long been favoured as the go-to tap product of choice by commercial providers seeking to optimise infection control. However the newly revised model takes that innovation to the next level.

We understand that you need the easiest, fastest method of maintaining high standards in an infection control regime so that you can keep your facilities running efficiently and safely.

The Long Lever option is ideal for hospital environments as the lever can be easily operated by a surgeon's elbow whilst scrubbing up!
