

THE ULTIMATE CARE SOLUTIONS

Designed specifically to meet the needs of the commercial sector environment, here at Bristan we have recently improved our commercial TMV3 shower valve range in order to aid infection control, and to support easier servicing and commissioning.

OUR IN-HOUSE TESTING AND ACCREDITATION

At every stage of development, all Bristan products pass through our UKAS 17025 accredited in-house testing centre. At the testing centre they're probed, examined, stressed, sourced, cycled and then analysed minutely for any defects, weak spot or design flaws. Only when they've passed every test in the book can they take their place in our product portfolio.

Our products are fully compliant to the UK Water Regulations, which guarantees your specifications fall in line with regulations and byelaws covering water supply and fitting.

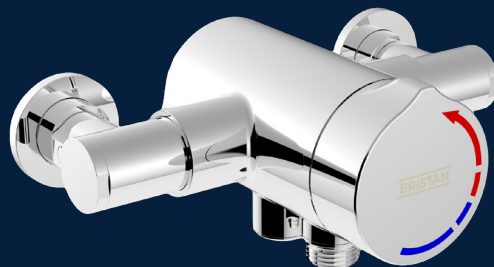

OUR CUSTOMER SERVICES

Wherever our products are installed, be it hospital, home or hotel, they come with the support of our Care Team. The team offer expert phone advice on installation, maintenance checks and general troubleshooting. Should there be a more complex problem, our field service engineers will solve it by coming to your site. We provide free support for all products under warranty, as well as being available for out of warranty products too.

SPECIFYING WITH CONFIDENCE

We aim to help make it as easy as possible to select the right products to complete your specification.

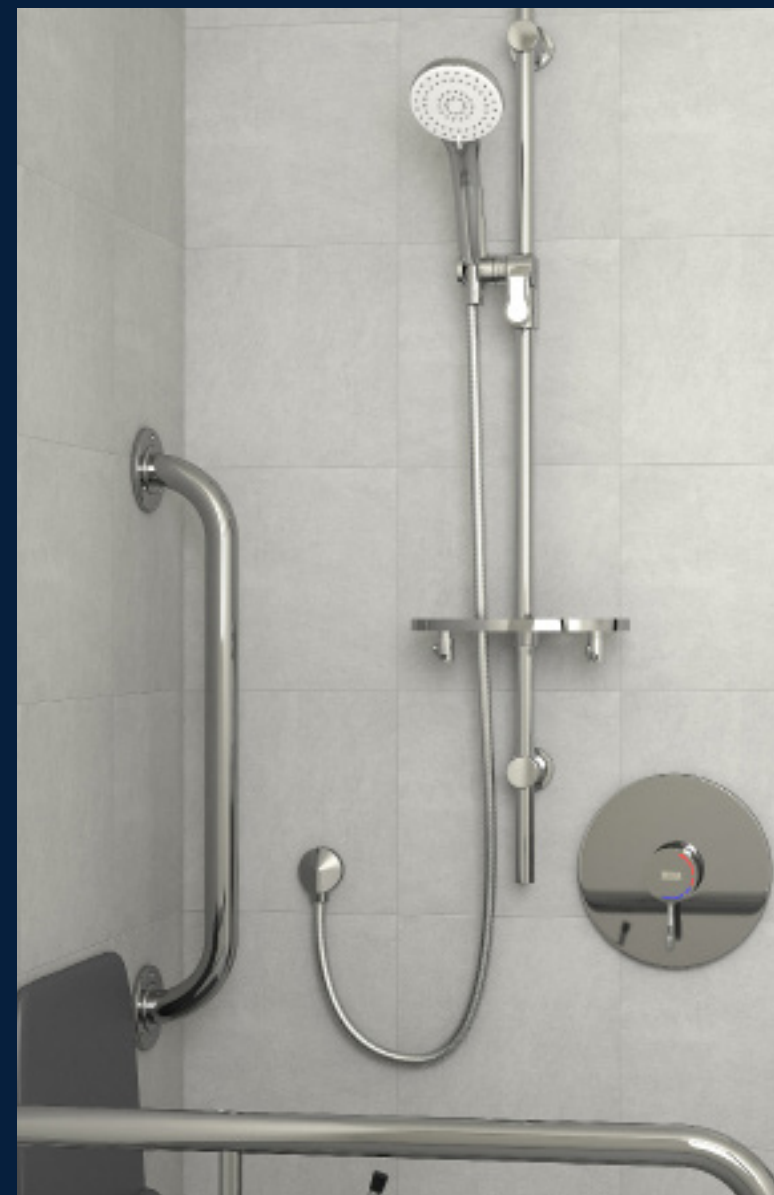

At Bristan we continually invest in new product development to ensure that our products excel in terms of quality, safety and performance, but are also attractively designed and are easy to install, use and maintain.

Bringing innovation and new technologies to our core commercial showering category. Our OPAC TMV3 Commercial Shower products have an improved; spec, performance, and infection control. Making it easier to install and easier to commission and service.
