

INTEGRAL FLUSH

The H64 combines our patented flush technology that does not require any additional bespoke equipment to service. Easy and quick to carry out thermal flush on valve for maintaining high standards in an infection control regime.

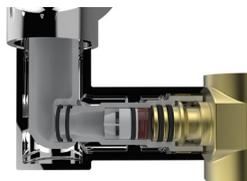

ISOLATION INLET

Easy to isolate (i.e. from the front of IPS panels), flexible centres for easier fitting. Simple single action isolation and filter removal for cleaning, no need to remove the tap from the wall/basin.

SPOUT

Removable spout (machined with an angled waterway to facilitate water draining) can be replaced and cleaned to help with infection control. Spout is fitted using a grub screw for security. Choice of fully draining (open outlet) or laminar flow straighteners (for non-draining spout) supplied.

ELBOWS

Smooth internal waterways help to limit bacterial growth. Cool touch hot inlet to prevent scalding resulting in additional safety.

SPECIFYING WITH CONFIDENCE

We aim to help make it as easy as possible to select the right additional products to complete your specification.

SOLO NON-THERMOSTATIC BASIN MIXER

SOLO-NM SL
SOLO-NM LL (LONG LEVER)

H64 SINGLE CONTROL WALL MOUNTED BASIN MIXER

Designed specifically to meet the acute demands of the medical environment, the Bristan H64 has long been favoured as the go-to tap product of choice by commercial providers seeking to optimise hygiene and efficiency. However the Bristan's newly revised model takes that innovation to the next level.

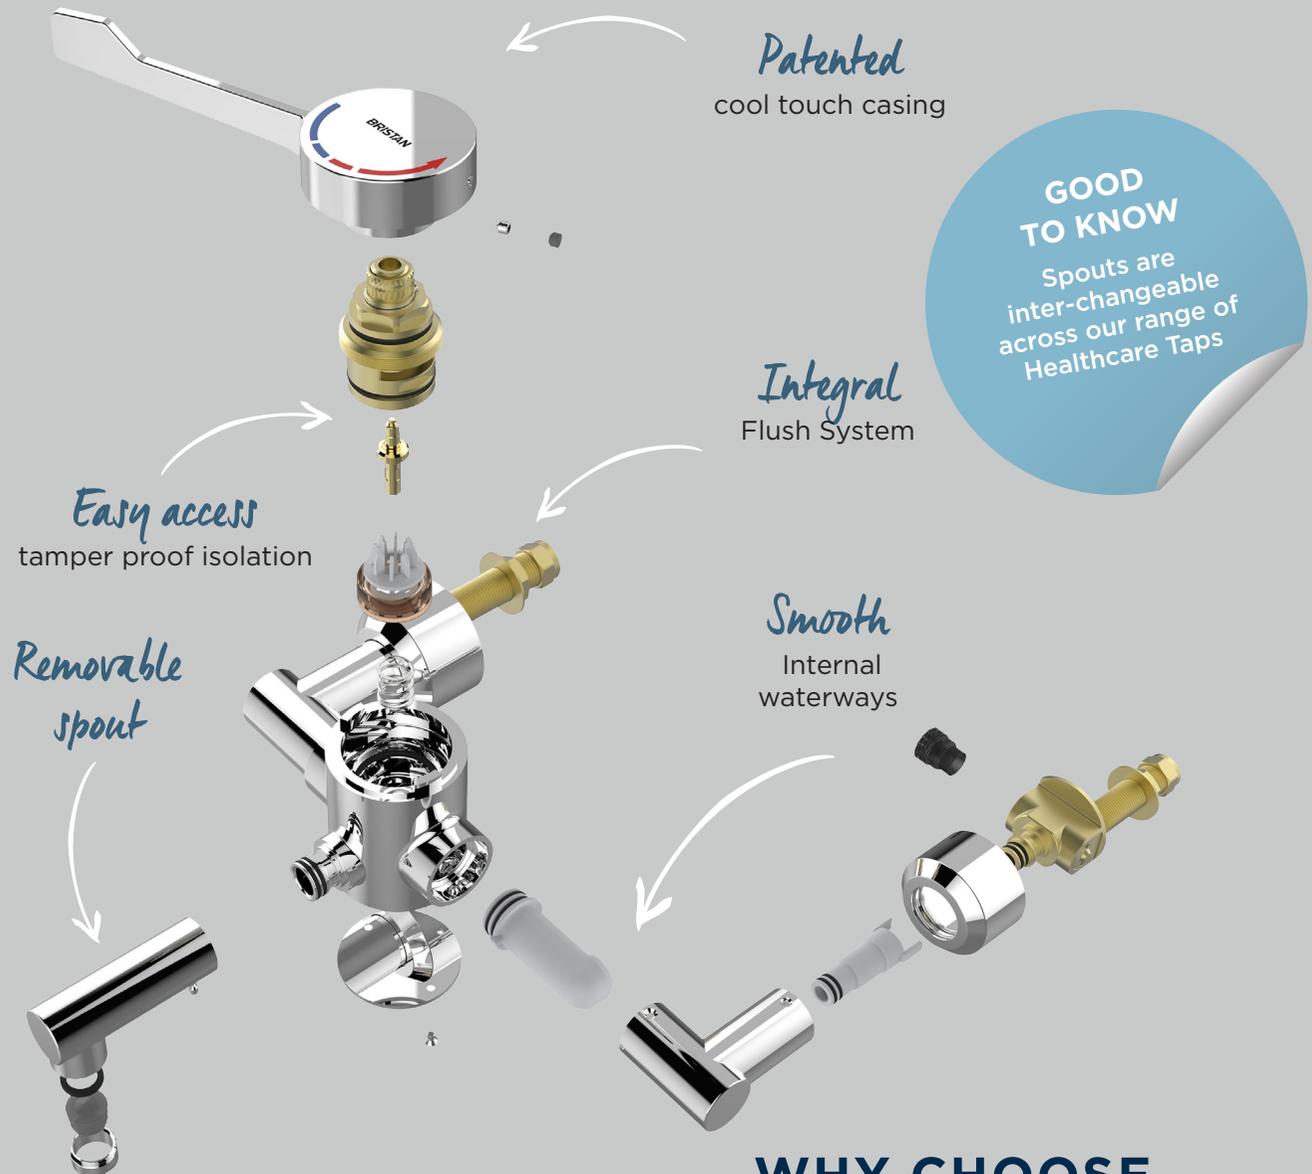

We understand that you need the easiest, fastest method of maintaining high standards in an infection control regime so that you can keep your wards running efficiently and safely. Bristan have combined a patented integral flush technology with the tamper-proof easy access isolation of the existing model for quick thermal flushing in line with infection control measures. Further consistent features include easy calibration and a cool touch to reduce scalding.

Available as deck or wall mounted

THE SAFEST HEALTHCARE MIXER TAPS FROM BRISTAN, HERE'S WHY:

WHY CHOOSE BRISTAN?

Bristan products are made from high grade materials to guarantee they stand the test of time. Our UK engineering team develop products based on research and insights into the needs of our customers ensuring we keep to the very highest of quality standards. We also operate an on-site test facility and all products meet the rigorous standards set by WRAS.
