

HIGHEST SAFETY

Maximum temperature setting & auto shut off to prevent scalding. Factory settings can be adjusted at installation to suit the user requirements.

EASE OF USE

Soft touch button, LED readout; audible bleeps (can be deactivated), different dial options & contrasting finishes. Unique warm up mode highlights when the shower has reached the selected temperature.

SIMPLE COMMISSIONING

Flexible fit with multiple water and cable entry points, digital fault code display and simple commissioning means a fast, fuss-free, new or replacement installation.

INCLUSIVE DESIGN

Designed for all family member usage. Choose from 3 model options with different kit lengths and control dials.

JOY CARE

THERMOSTATIC ELECTRIC SHOWER

Joy Care, a BEAB Care and RNIB (Royal National Institute of Blind People) endorsed shower from Bristan, takes into account the needs of the elderly and people with disabilities, without compromising on style or performance. Designed for all family use, these showers won't look out of place in any bathroom setting.

What makes Joy care different is not only safety and ease of use but the inclusion of unique features such as an LED digital setting readout and warm up mode. Our Joy Care shower is both stylish and practical for those who have different showering requirements and where specifier peace of mind is essential.

Additional features such as a phased shutdown helps to reduce limescale build up which in turn extends the life of the shower. Coupled with thermostatic technology for ultimate water temperature consistency, (regardless of water being used elsewhere in the home) Joy Care is the perfect shower for ultimate user safety.

Available in
